1. BACKGROUND

House Bill 2868 required the Department of Administration to issue a Request for Proposal (RFP) for the construction and operation of 3,000 minimum security prison beds within the state of Arizona. HB2868 allows for the Department of Corrections to bid on the RFP. Due to the possibility for a conflict of interest the determination below was made by the Department of Administration.

2. DETERMINATION

TITLE: Conflict of Interest in Solicitation for DOC Private Prison Beds, HB2868

AUTHORITY:

A.R.S. 41-2504 Supplementary general principles of law applicable
R2-7-102 Written Determinations
R2-7-101 Definitions, No. 31 Interested Party
A.R.S. 41-2514 Procurement Advisory Groups
A.R.S. 41-2564 Relationship with Agencies

DETERMINATION:

HB2868 signed by the Governor on June 21, 2006 requires the Department of Administration (ADOA) to issue a Request for Proposal (RFP) for 3000 prison beds to be opened the beginning of April, 2008.

HB2868 also specifies that private prison vendors and the Department of Corrections (DOC) may bid on the RFP.

As ADOA must confer with DOC as to the specific requirements of the 3000 beds; custody level, security, programmatic, etc, DOC will be instrumental in the articulation of the RFP Scope of Work.

With the apparent possibility for a conflict of interest with the need to prepare the SOW and the legal authority to also bid on the solicitation, as much as practicable state government staff have been separated into two distinct responsibility areas: solicitation development or DOC proposal submittal. The individuals have been identified and the names shared with instructions to limit any discussion/documents that could compromise the procurement process by the sharing of information.

These actions are taken to provide safeguards for the maintenance of the procurement system in regard to quality and integrity.

DOCUMENTATION:

This Determination shall be included in the procurement file in accordance with R2-7-102.

EFFECTIVE:

This Determination is effective September 13, 2006 and shall remain in effect until contract award.

SCOPE OF WORK

2.1 INTRODUCTION

- 2.1.1 In response to House Bill 2868 the state of Arizona is seeking proposals for the construction and/or operation of 3,000 minimum security prison beds within the state of Arizona to address a current and anticipated bed shortage. It is projected that the inmate population will continue to increase at a level that exceeds the capacity of existing Arizona Department of Corrections operated facilities. The state of Arizona is seeking qualified Offerors who will present a systematic correctional approach to advance Arizona's growing continuum of evidence-based security practices and inmate focused program services. This should be accomplished through and in alignment with sound correctional practice that strengthens public safety now and public safety later. Proposed security and program systems should reinforce inmate's responsibility, motivation and ability to practice, every day on the inside, pro-social thinking, civil behavior and positive decision making. The goal is to support the evidence-based outcomes of literacy, sobriety, employability and successful re-entry into society to reduce, relapse, revocation and recidivism.
- 2.1.2 The Department of Corrections is in need of 3,000 permanent beds to include 1,000 minimum security beds for females and 2,000 minimum security beds for males. Offerors may submit a proposal for 3000 beds to include 2000 male beds and 1000 female beds or any portion thereof but not less than 500 beds each for male or female inmates. Offerors can expand an existing facility or construct a new facility. The design shall include minimum security perimeter requirements, and minimum security interior requirements, and be designed to support Direct Supervision/ Unit Management operations. Offerors may offer a medium security perimeter as an option and shall provide the pricing on the fee schedule. Female inmate beds shall not be within site and sound of Male inmate beds.
- 2.1.3 The State requires the secure facilities be ready for occupancy in April 2008 in accordance with House Bill 2868. An incrementally phased occupancy shall begin with 1000 beds in April 2008, or as may be negotiated by the State.
- 2.1.4 The location of the facility(s) must be within the state of Arizona. Any county or counties within the state are acceptable for the proposed facility (ies). It is preferable that the 1,000 female beds be located in the greater Phoenix/Tucson metropolitan area(s).
- 2.1.5 The State will analyze the location proposed and factors which affect operational costs which include at a minimum: labor resources, employee cost of living, officer turnover rates, distance from available housing, criminal justice competition and other related factors.
- 2.1.6 The provision of all services consistent with the requirements herein (structure/operation/staff/programming) shall be the basis for deriving a per diem rate.
- 2.1.7 Services shall include the provision of a structure(s) for the management and operation of the secure facility, to include all aspects of prison operations, i.e., security, staffing, food services, medical services, physical plant, maintenance, inmate programming based on a Parallel Universe model, which includes, assessment, inmate plans, full, targeted and evidence-based programming, direct supervision, unit management, incentives, re-entry planning, and services.
- 2.1.8 To ensure the maximum number of inmates are employed, it is the desire of the Department of Corrections to optimize the development of third party Inmate Work Contracts between Arizona

2.2.1.8 **Cognitive Restructuring.** A systematic approach to restructuring how an individual sees the world, thinks, problem solves and communicates effectively. - 2.2.1.24 **Fast Track.** A streamlined assessment and programming process available within the ADC for inmates who have been sentenced to the Department of Corrections for six months or less. Currently the Department of Corrections is piloting this process with minimum security male and female inmates. It is the Department of Corrections plan to expand this unique program option (over time) in recognition of the unique situation and public safety opportunity that these short term inmates present.
- 2.2.1.25 **100% Full Programming.** This refers to the requirement that inmates will be fully engaged (at least 32 hours per week) in addressing the work and the criminal risk factors identified in their Inmate Corrections Plan in the next two years. In addition, it is expected that offenders address their non-work, self-improvement, leisure, family and community responsibilities, just as the general public must. Gender specific programming is appropriate when evidence based.
- 2.2.1.26 **Inmate Corrections Plan.** During 2007 the Department of Corrections will begin to systematically capture in an automated summary document the Needs and Risks identified for each incoming offender during Intake and Assessment. The resulting needs will identify those specific areas in the individual's life that are driving or contributing to the offender's criminality. These factors will be prioritized and available to the receiving identified institutional staff assigned to the offender. This targeted information will constitute what the offender will work to complete during incarceration and on parole.
- 2.2.1.27 **Inmate Plan Management.** Utilizing the inmate's Corrections Plan, staff work with the inmate to maximize their successful completion of targeted outcomes. This Plan Management concept is results-oriented and replaces the older Case Management process thinking. In addition to ongoing and event driven conversations, an in-depth, personal interview is required with each inmate no less than once a year.
- 2.2.1.28 **Inmate Wages.** Compensation that can be earned by inmates in accordance with A.R.S. §31-254 and the Department of Corrections Work Incentive Pay Program (WIPP).

- 2.2.1.43 Pre-Service Security Training. Training shall include direct supervision equivalent to the Department of Corrections curricula that the Offeror is required to provide to all staff designated as Security Officers.
- 2.2.1.44 Public Safety Now and Public Safety Later. This is a phrase associated with the awareness that sound correctional practice and true public safety must take into consideration methods and interventions which accomplish both goals of public safety Now and Public Safety Later. This means that we utilize sound correctional practices to manage prisons safely and effectively while returning offenders to the community who are less likely to recidivate.
- 2.2.1.45 Re-Entry Planning. This concept refers to planning for re-entry from day one, upon intake, through their incarceration, community supervision and beyond. Re-entry skills are integrated into every daily activity, allowing inmates to practice good citizenship skills which will reduce relapse, revocation and recidivism.
- 2.2.1.46 Security Agency. An agency that has qualified to receive a license from Department of Public Safety (DPS) in accordance with A.R.S. Title 32, Chapter 26, Article 2, if applicable.

- 2.2.1.51 Suicide Prevention. A program for suicide prevention shall be written and in place. Inmate suicide prevention aids shall be part of this written plan.
- 2.2.1.52 The 7X3X3 Correctional Environment. This is a corrections methodology for identifying dimensions of life requiring attention. These dimensions are then operationalized into structured prison and parole routines. demonstrating personal accountability. This correctional methodology is evidence-based and is clearly supported in Social Learning research.

Seven days a week, twenty four hours a day the inmate's life is patterned around work and non-work hours. Thus, the inmate's day has three parts: work (in its broadest sense) which is composed of work, treatment and the continuum of Work Force Development programmed at 100% in the next two years, and non-work, divided into two parts, self improvement/leisure and family reunification/community betterment. If Arizona is to maximize the offender's probability of successful re-entry back into society, activities must be planned and implemented to address all three areas.

2.2.1.53 Unit Management. This "team centered" administrative concept is a correctional model that galvanizes the different professional disciplines around the common management within their unit. It integrates all of the positive elements of informed administration and puts them to work through a team based model at the unit level.

2.2.1.54 Welfare and Benefit Fund (W&B Fund). Fund established and managed by the Offeror which shall be used for the benefit of assigned inmates to pay for equipment or services in a manner similar to Department of Corrections Written Instructions regarding its Special Services Fund (Inmate Activities and Recreation Fund [A&R Fund]). Monies for the W&B Fund shall be generated from profits made on the sale of commissary items and revenue received for the inmate telephone system.

2.2.1.54.1 Work. This definition is used in two distinct ways. The first refers to an inmate's physical labor. The second relates to the inmates "primary job" in prison and on parole to acquire the life skills (literacy, sobriety, employability and civility) necessary to succeed in society.

2.2.1.54.2 Work-based Education (WBE). This system combines the best aspects of several evidence-based Work Force Development concepts into a comprehensive approach for successful re-entry to the workforce. It combines classroom instruction with hands on "real" work in a production environment. It employs all of the active ingredients for success in the workplace: skill building, classroom instruction, customer contact, an understanding of quality control and quality assurance concepts, production time-lines, material and raw product costs, teamwork, etc. The goal is to create a work and learning environment so much like being on a real job that you can't tell the difference.

2.2.1.55 5X5 Assessment Results. This represents the two dimensions of our new assessment protocol. The Risk element of this protocol is based on 12 years of Department of Corrections validated research with over 50,000 offenders. It captures two dimensions of risk using a five point scale. There is a general recidivism risk scale and a risk of violence scale. They are combined to give the offender a composite risk score. The five level Need Score is bed-rocked in evidence-based testing tools specifically normed to prison populations in several core criminogenic areas. The Risk and Need levels are matrixed to produce an overall intervention level and service delivery sequence for each inmate.

2.2.1.56 Minimum Security Facility and Population.
Facility - Dormitory living; single bunks; central dining; unescorted movement to meals, education, work and recreation; Inmates can work outside the complex doing Community Betterment Projects; single /14 foot fence with razor wire and no climb top. A medium
